- CSS3
- PostgreSQL
- SASS
- MongoDB

## TOOLS

- Git
- AWS
- Agile Methodology
- GitHub
- Heroku
- Trello
- Vercel

# SIMON TANNA

## JUNIOR FULL-STACK DEVELOPER

## SUMMARY

A creative developer who is confident working with front-end and back-end frameworks. Passionate about solving problems and working to improve the quality of my code. Team oriented and teachable in programming languages not in my current stack.

## KEY PROJECTS

- [Hot Vinyl Records](#)
  - A 2-sided marketplace application where a user can buy and sell premium vinyl records.
  - Built using the Ruby on Rails it demonstrates CRUD implementation, AWS and Stripe payment integration and user authentication with permissions.
  - Other features include album and artist search, buyer receipt send to email and admin access.

[Hot Vinyl Records GitHub Repo](#)

- [Colours of Kanye](#)
  - A group hackathon project created in 48 hours using vanilla JavaScript, API calls and basic HTML/CSS.
  - Colours of Kanye uses API calls to display random Kanye West quotes styled with random colours from a colour palette API.
  - The application features a "safe for work" function that removes any swear-words from a given quote and replaces them with non-swear word.

## TECH SKILLS

- Back-End Development
- Front-End Development
- Test Driven Development
- Version Control (Git)
- Project Management

## FUN FACTS

- I'm a totally awesome piano and keyboard player who worked professionally in a band for 6 years!
- I love to cook food from all around the world (...ask me for my butter chicken recipe. It is the best!)

## OTHER EXPERIENCE

- Customer Service Industry
- Hospitality
- Corporate Team Building and Training
- Music and Entertainment
- Public Service Sector

## REFERENCES

- Available upon request

Junior Full-Stack Developer

## KEY PROJECTS CONT...

- [Football Shootout](#)
  - A fun 5-a-side football sim game built using Ruby and tested using rspec.
  - Uses ASCII art gem for text styling and faker gem to generate random professional footballer names.
  - User can specify their name using command-line arguments upon launch
  - Features an extra-time variable when scores are tied after 5 phases of play.

[Football Shootout GitHub Repo](#)

- [Portfolio Website](#)

My personal portfolio website built using HTML and CSS. It features a responsive layout and CSS animations.
